Collaboration with BIM (Strategic Overview)

With Cadline

Description

Part one of the stand alone webinar series aims to show you what BIM is and how it can be implemented in your company. Learn about the applications of BIM and where it can eliminate inefficiencies on the site, reducing build time and cutting costs. BIM technology integrates multi-disciplinary data to create detailed digital representations that are managed in an open cloud platform for real-time collaboration. This means that multiple teams can work together on the same information without clashing.

Learning Objectives:

- Participant should understand how a BIM project works.
- The roles involved in a BIM process should be clear.

Who should attend

Who should attend?

- Management contemplating employing BIM
- Project managers
- Engineers
- Architects
- Contractors

Agenda

- Introductions
- History Lesson
- Risk
- Building Information Modelling!!
- Trends Driving Adoption
- Why Now, what's in it for me?
- Technology in Play
- Examples
- Questions

Duration:
45 mins

Date:
2pm 10th March

Collaboration with BIM (BIM Technologies) With Cadline

Description

Part two of the series shows what technology is available, and what it can do. In this webinar we look to answer all your questions on the technologies available for your next BIM project. BIM not only allows design and construction teams to work more efficiently, but it allows them to capture the data they create during the process to benefit operations and maintenance activities. Learn what technologies are involved and how they can be harnessed.

Learning Objectives:

- Participant should understand what technologies are on the market.
- The uses and benefits of each piece of software will be identified.

Who should attend

Who should attend?

- Management contemplating employing BIM
- Project managers
- Engineers
- Architects
- Contractors

Agenda

- Ensuring the BIM Strategy is in place
- The Importance of a CDE
- Implementing ISO 19650
- The Key to 3D Authoring
- The Essentials of 4D Planning
- The Use of the Data beyond Construction
- Summary
- Questions

Duration:
45 mins

Date:
2pm 24th March
